PROFESSIONAL SUMMARY

Commercial Data Analyst with hands-on experience building dashboards and using SQL and Power Query to extract, consolidate, and analyse data for revenue, pricing, and performance reporting. Background in pricing, cost, and profitability analysis at RAAK Hydraulic, translating commercial data into recommendations for senior stakeholders. Comfortable managing inbound analytics requests independently and prioritising competing demands in fast-paced, client-facing environments. Combines a BrainStation Data Analytics qualification with a Mechanical Engineering degree for a structured, evidence-based approach to commercial and operational analysis.

SKILLS

Technical Skills: Tableau (Dashboard Development), SQL (Data Extraction & Querying), Power BI, Power Query, Advanced Excel (PivotTables, Modelling).

Commercial Analysis: Pricing, Cost & Profitability Analysis, Revenue & Performance Reporting, KPI Tracking, Commercial Decision Support.

Core Competencies: Data Consolidation from Multiple Sources, Data Cleaning & Validation, Monthly/Ad Hoc Reporting Cycles, Stakeholder Communication, Managing Inbound Data Requests.

Programming & Automation: Python (Data Analysis).

PROFESSIONAL EXPERIENCE

Data Analyst — Entralon Real Estate | London

Feb 2024 – Mar 2026

- Built and maintained BI dashboards, using Power Query and SQL to extract and consolidate data from multiple sources for monthly and ad hoc commercial reporting cycles.
- Analysed sales, revenue, and operational data to identify trends and inform business decisions, delivering insights (not just outputs) to senior stakeholders.
- Cleaned, structured, and validated complex data from multiple sources to ensure accuracy and a single source of truth for reporting.
- Partnered with senior stakeholders to move reporting from manual processes toward clearer, more consistent, dashboard-led insight.
- Managed inbound analytics requests independently, prioritising competing demands in a fast-paced environment.

Commercial Retail Associate (Via Agency) — Jimmy Choo | London

Mar 2026 – Present

- Provide flexible, premium client service and operational support on a contract basis within luxury retail environments.
- Utilise in-store inventory systems to monitor stock levels and ensure accurate data tracking against daily sales targets.
- Maintain strong, professional communication in fast-paced, client-facing settings, effectively managing ambiguity.

Commercial Analyst Intern — RAAK Hydraulic | London

Jan 2023 – Feb 2024

- Conducted pricing, cost, and profitability analysis across products to support commercial decision-making and revenue growth.
- Supported finance and commercial teams through cost tracking, invoice management, and financial reporting activities.
- Performed reconciliation and validation of operational and financial records to improve reporting accuracy.

EDUCATION

Data Analytics Graduate Certificate — BrainStation | London

2025

- Handled large, complex datasets using SQL for retrieval and analysis, and Python for data manipulation and automation.
- Built interactive reporting solutions in Power BI and Tableau, focusing on customer segmentation and trend analysis.

BEng Mechanical Engineering — London South Bank University

2021 – 2024
